SECUREALERT, INC. AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(1) BASIS OF PRESENTATION

The unaudited interim condensed consolidated financial information of SecureAlert, Inc. and subsidiaries (collectively, the "Company" or "SecureAlert") has been prepared in accordance with the Instructions to Form 10-Q and Article 8 of Regulation S-X promulgated by the Securities and Exchange Commission ("SEC"). Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the accompanying interim consolidated financial information contains all adjustments, consisting only of normal recurring adjustments necessary to present fairly the Company's financial position as of June 30, 2014, and results of its operations for the three and nine months ended June 30, 2014 and 2013. These financial statements should be read in conjunction with the annual consolidated financial statements and notes thereto that are included in the Company's Annual Report on Form 10-K for the year ended September 30, 2013. The results of operations for the three and nine months ended June 30, 2014 may not be indicative of the results for the fiscal year ending September 30, 2014.

(2) PRINCIPLES OF CONSOLIDATION

The condensed consolidated financial statements include the accounts of SecureAlert and its subsidiaries. All significant inter-company transactions have been eliminated in consolidation.

(3) RECENTLY ISSUED ACCOUNTING STANDARDS

From time to time, new accounting pronouncements are issued by the Financial Accounting Standards Board (FASB) or other standard setting bodies, which are adopted by the Company as of the specified effective date. Unless otherwise discussed, the Company believes that the impact of recently issued standards that are not yet effective will not have a material impact on its financial position or results of operations upon adoption.

In May 2014, the Financial Accounting Standards Board ("FASB") issued an Accounting Standard Update ("ASU") No. 2014-09, "Revenue from Contracts with Customers (Topic 606)." This ASU includes a five-step process by which entities will recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration to which an entity expects to be entitled to in exchange for those goods or services. The standard also will require enhanced disclosures to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The ASU is effective for annual and interim reporting periods beginning after December 15, 2016, with early adoption prohibited. We are currently evaluating the impact this ASU will have on our consolidated financial statements.

(4) IMPAIRMENT OF LONG-LIVED ASSETS

The Company reviews its long-lived assets for impairment when events or changes in circumstances indicate that the book value of an asset may not be recoverable and in the case of goodwill, at least annually. The Company evaluates whether events and circumstances have occurred which indicate possible impairment as of each balance sheet date. If the carrying amount of an asset exceeds its fair value, an impairment charge is recognized for the amount by which the carrying amount exceeds the estimated fair value of the asset. Impairment of long-lived assets is assessed at the lowest levels for which there is an identifiable fair value that is independent of other groups of assets. The Company recorded \$75,000 and \$150,000 of impairment expenses related to monitoring equipment for the three months ended June 30, 2014 and 2013, respectively. Additionally, the Company recorded \$225,000 and \$450,000 of impairment expenses related to monitoring equipment for the nine months ended June 30, 2014 and 2013, respectively.

(5) BUSINESS COMBINATIONS

The Company accounts for its business acquisitions under the acquisition method of accounting as indicated in ASC 805, Business Combinations, which requires the acquiring entity in a business combination to recognize the fair value of all assets acquired, liabilities assumed, and any non-controlling interest in the acquiree; and establishes the acquisition date as the fair value measurement point. Accordingly, the Company recognizes assets acquired and liabilities assumed in business combinations, including contingent assets and liabilities and non-controlling interest in the acquiree, based on fair value estimates as of the date of acquisition. In accordance with ASC 805, the Company recognizes and measures goodwill as of the acquisition date, as the excess of the fair value of the consideration paid over the fair value of the identified net assets acquired.

Acquired Assets and Assumed Liabilities

Pursuant to ASC No. 805-10-25, if the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, but during the allowed measurement period not to exceed one year from the acquisition date, the Company retrospectively adjusts the provisional amounts recognized at the acquisition date, by means of adjusting the amount recognized for goodwill.

Contingent Consideration

In certain acquisitions, the Company agrees to pay additional amounts to sellers contingent upon achievement by the acquired businesses of certain negotiated future goals, such as targeted earnings levels. The Company records contingent consideration based on its estimated fair value as of the date of the acquisition. The Company evaluates and adjusts the value of contingent consideration, if necessary, at each reporting period based on the progress toward and likely achievement of certain targets on which issuance of the contingent consideration is based. Any differences between the acquisition-date fair value and the changes in fair value of the contingent consideration subsequent to the acquisition date are recognized in current period earnings until the arrangement is settled.

(6) ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The Chilean Peso and New Israeli Shekel are used as functional currencies of the operating subsidiaries SecureAlert Chile, SpA and GPS Global Tracking and Surveillance System Ltd., respectively. The balance sheets of all subsidiaries have been converted into United States Dollars (USD) at the exchange rate prevailing at June 30, 2014. Comprehensive loss includes net loss as currently reported under U.S. GAAP and other comprehensive loss. Other comprehensive loss considers the effects of additional economic events, such as foreign currency translation adjustments, that are not required to be recorded in determining net loss, but rather are reported as a separate component of stockholders' equity.

(7) GEOGRAPHIC INFORMATION

During the nine months ended June 30, 2014, the Company recognized revenues from international sources from its products and monitoring services. Revenues are attributed to the geographic areas based on the location of the customers purchasing and leasing the products and services. The revenues recognized by geographic area for the three and nine months ended June 30, 2014 and 2013, are as follows:

	Three Months Ended June 30,				Nine Months Ended June 30,

The long-lived assets, net of accumulated depreciation, used in the generation of revenues by geographic area as of June 30, 2014 and September 30, 2013, were as follows:

(8) NET LOSS PER COMMON SHARE

Basic net loss per common share ("Basic EPS") is computed by dividing net loss available to common shareholders by the weighted average number of common shares outstanding during the period.

Diluted net loss per common share ("Diluted EPS") is computed by dividing net loss attributable to common shareholders by the sum of the weighted-average number of common shares outstanding and the weighted-average dilutive common share equivalents outstanding. The computation of Diluted EPS does not assume exercise or conversion of securities that would have an anti-dilutive effect.

Common share equivalents consist of shares issuable upon the exercise of common stock options and warrants, and shares issuable upon conversion of preferred stock. As of June 30, 2014 and 2013, there were 444,677 and 4,460,230 outstanding common share equivalents, respectively, that were not included in the computation of Diluted EPS as their effect would be anti-dilutive. No reconciliation for discontinued operations was provided since the impact was immaterial. The common stock equivalents outstanding as of June 30, 2014 and 2013 consisted of the following:

	June 30, 2014	June 30, 2013
Conversion of debt and accrued interest	-	3,846,758

(9) ACQUISITIONS

On March 12, 2014, the Company entered into a Share Purchase Agreement (the "SPA") to purchase from Eli Sabag, an individual resident of the State of Israel ("Seller"), all of the issued and outstanding shares ("Shares") of GPS Global Tracking and Surveillance System Ltd., a company formed under the laws of and operating in the State of Israel ("GPS Global"). The SPA contained customary representations and warranties and covenants, including provisions for indemnification, subject to the limitations described in the SPA. Subsequent to the closing, the Seller and certain key employees of GPS Global entered into employment agreements and continue to operate GPS Global. The SPA also granted the Seller the right for a three-year period following the closing, to nominate one director to serve on the Registrant's board and on GPS Global's board of directors. The closing of the transaction, which occurred on April 1, 2014, was subject to customary closing conditions.

The purchase price for the Shares is to be \$7,811,404 and is payable in cash and shares of Registrant's common stock as follows:

- Cash to Seller of \$311,404 at the closing;
- Shares of Registrant's common stock valued at \$7,500,000, delivered to Seller as follows:
- Common stock valued at \$1,600,000 delivered to Seller at the closing.
- Common stock valued at \$2,900,000, delivered to an escrow agent ("Bank") to be released by Bank to Seller after six months from the closing, conditioned upon Registrant's verification that GPS Global's global positioning satellite ("GPS") products (the "Devices") meet expected operating specifications;
- Common stock valued at \$1,000,000, the number of shares to be determined by dividing \$1,000,000 by the weighted average closing price of the Registrant's common stock for the 60 consecutive trading days preceding the third business day prior to release of such shares, to be issued to Seller by Registrant within 30 days of certification that GPS Global has sold or leased a minimum of 1,500 of its Devices under revenue-generating contracts; and
- Common stock valued at \$2,000,000, the number of shares to be determined by dividing \$2,000,000 by the weighted average closing price of the Registrant's common stock for the 60 consecutive trading days preceding the third business day prior to release of such shares, to be issued to Seller by Registrant within 30 days of certification that GPS Global has sold or leased a minimum of 2,500 of its Devices under revenue-generating contracts, in addition to the 1,500 Devices previously mentioned (i.e., a minimum of 4,000 Devices sold or leased).

As described above, shares of common stock valued at \$3,000,000 may be payable based on sales of the GPS Global devices sold or leased. Management determined that it was probable that sales of GPS Global devices would exceed the number of units specified in the SPA, and has therefore, recognized a Stock Payable liability for the entire \$3,000,000 value of common shares payable.

The total purchase price for the GPS Global acquisition was allocated to the net tangible and intangible assets based upon their fair values as of March 31, 2014 as set forth below. The excess of the purchase price over the net assets was recorded as goodwill.

The following table summarizes the fair values of the assets and liabilities assumed at the acquisition date (in thousands).

Legal Matters

<u>Lazar Leybovich et al v. SecureAlert, Inc.</u> On March 29, 2012, Lazar Leybovich, Dovie Leybovich and Ben Leybovich filed a complaint in the 11th Circuit Court in and for Miami-Dade County, Florida alleging breach of contract with regard to certain Stock Redemption Agreements. The complaint was subsequently withdrawn by the plaintiffs. An amended complaint was filed by the plaintiffs on November 15, 2012. The Company believes these allegations are inaccurate and intend to defend the case vigorously. No accrual for a potential loss has been made as management believes the probability of incurring a material loss is remote.

Christopher P. Baker v. SecureAlert, Inc. In February 2013, Mr. Baker filed suit against the Company in the Third Judicial District Court in and for Salt Lake County, State of Utah. Mr. Baker asserts that the Company breached a 2006 consulting agreement with him and claims damages of not less than \$210,000. The Company disputes the plaintiff's claims and will defend the case vigorously. No accrual for a potential loss has been made as management believes the probability of incurring a material loss is remote.

SecureAlert, Inc. v. Derrick Brooks and STOP, LLC. On February 21, 2014, the Company filed a complaint in the Third Judicial District Court, Salt Lake County, State of Utah, against Derrick Brooks and STOP, asserting claims for declaratory relief, breach of contract, tortious interference with prospective economic relations, tortious interference with contract, misappropriation of trade secrets, injurious falsehood/trade libel/business disparagement, defamation, respondeat superior, injunctive relief and punitive damages. On March 20, 2014, the Company entered into a settlement agreement with STOP and all of the claims between the Company and STOP in the litigation have been dismissed with prejudice. On April 9, 2014, Mr. Brooks filed an answer denying the Company's claims and asserting counterclaims for constructive discharge, interference with contract, interference with prospective economic relations and blacklisting. In his counterclaim, Mr. Brooks seeks to recover "not less than \$150,000" on each of his claims. The Company has not yet responded to Mr. Brooks' counterclaims, but management believes them to be without merit and the Company intends to vigorously defend against them. No accrual for a potential loss has been made as management believes the probability of incurring a material loss is remote.

(24) SUBSEQUENT EVENTS

- 5) Related party notes payable in the amount of \$1.5 million and \$1.2 million were extended through November 19, 2015 and December 30, 2014, respectively.
- 6) On July 2, 2014 the Company purchased, through its subsidiary Emerge Monitoring II, LLC, the remaining 35 percent equity interest of Integrated Monitoring Systems LLC a Colorado limited liability company ("IMS"). The purchase price was \$350,000 paid to Future Technology Partners, LLC. The Company now controls 100 percent of IMS.
- 7) On August 8, 2014, cash proceeds of \$1,488,788 held as a bond by an international customer were returned to the Company.
- 8) On June 10, 2014 the Company submitted a utilization request under the amended Facility Agreement to Safety requesting the remaining \$10,000,000. On August 13, 2014 Safety provided \$6,000,000 to the Company. The balance of \$4,000,000 is expected to be funded within 30 days. While the funding of this utilization request is a technical default by Safety under the terms of the Facility Agreement; the Company and Safety are working together to remedy the default. The Company is realizing \$2,500 per day and an interest benefit which will offset accumulated interest owed to Safety under the Facility Agreement. Management expects this matter to be resolved within 30 days and the delayed funding will not materially affect operations of the Company.
- 9) On August 6, 2014 the Company's subsidiary, SecureAlert Chile SpA ("SecureAlert-Chile") was notified by Gendarmeria de Chile (the Republic of Chile's uniformed prison service) the contract between the Gendarmeria and SecureAlert-Chile to provide electronic (GPS and residential) monitoring of offenders and other services to the Chilean government will now proceed to the next phase and devices will be installed on offenders. The Company expects to begin realizing revenue in the first quarter of its next fiscal year. As referenced in the formal agreement with the Chilean government, filed as an exhibit to Form 8-K filed by the Company on November 20, 2013, the contract will run for a term of 41 months with revenues of up to approximately \$70,000,000. The performance bond posted by SecureAlert-Chile has been extended to provide for the full 41 months of service under the contract and we expect the performance bond to be returned by September 5, 2018.

General

We market and deploy offender management programs, combining patented GPS tracking technologies, fulltime 24/7/365 intervention-based monitoring capabilities and case management services. Our vision is to be the global market leader for delivering the most reliable offender management solutions, which leverage superior intervention capabilities and integrated communication technologies. We believe that we currently deliver the only offender management technology, which effectively integrates GPS, RF and an interactive 3-way voice communication system into a single piece device, deployable worldwide. Through our patented electronic monitoring technologies and services, we empower law enforcement, corrections and rehabilitation professionals with offender, defendant, probationer and parolee programs, which grant convicted criminals and pre-trial suspects an accountable opportunity to be "free from prison". This provides for greater public safety at a lower cost compared to incarceration or traditional resource-intensive alternatives.

Strategy

Our global growth strategy is to empower worldwide national security officials, law enforcement, corrections departments and rehabilitation professionals with single-sourced offender management solutions, which integrate reliable intervention technologies supporting re-socialization or mandated monitoring initiatives. The use of our interactive services and intervention products is intended to provide law enforcement and judiciaries alike, with the ability to provide offenders a level of unmatched "real-time" accountability, while preserving public safety costs that are lower than with the cost of traditional incarceration or other transitional service offerings.

We intend to accomplish our global strategy through the "value-driven" yet profitable deployment of a portfolio of proprietary and non-proprietary GPS/RF real-time monitoring and intervention products and services, which can also include alcohol and drug tracking and testing on behalf of corrections, probation, law enforcement and rehabilitation personnel worldwide, all in support of offender reformation, resocialization and recidivism reduction initiatives.

Our exclusive portfolio of products and services balances the need to dynamically track and monitor offenders with the opportunity to positively encourage and transform offenders, with the aim of reducing recidivism rates through our proprietary projects, programs and initiatives.

We will continue to innovate, acquire, develop and deploy adaptive, cost-effective and reliable interactive technologies, which meet the ever-changing needs of our global clients, while providing value-driven and enhanced public safety services. Our goal is to continue to manufacture proprietary technologies, including our RADAR alcohol monitoring device acquired with Emerge, while also procuring complementary technologies through companies such as Alcohol Monitoring Services and 3M's MEMS Alcohol Monitoring and TRaCE Inmate Tracking Products.

In summary, SecureAlert is committed to delivering a superior proprietary and non-proprietary portfolio of reliable, intervention monitoring products and services for the global offender management marketplace, where we are currently targeting pilots and deployments throughout the world in various regions (North America, Latin America, the Caribbean, Australasia, Africa and Europe).

Critical Accounting Policies

From time to time, management reviews and evaluates certain accounting policies that are considered to be significant in determining our results of operations and financial position.

The preparation of financial statements requires management to make significant estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. By their nature, these judgments are subject to an inherent degree of uncertainty. We assess the reasonableness of our estimates, including those related to bad debts, inventories, intangible assets, warranty obligations, product liability, revenue, and income taxes. We base our estimates on historical experience as well as available current information on a regular basis. Management uses this information to form the basis for making judgments about the carrying value of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

Results of Operations

Continuing Operations - Three months ended June 30, 2014, compared to three months ended June 30, 2013

Revenues

For the three months ended June 30, 2014, the Company recognized revenues from operations of \$3,150,821, compared to \$2,685,214 for the three months ended June 30, 2013, an increase of \$465,607 (17%). Of these revenues, \$2,976,894 and \$2,520,185, respectively, were from monitoring and other related services, an increase of \$456,709 (18%). The increase was largely due the addition of revenues generated by the Company's newly acquired subsidiary, Emerge Monitoring, Inc. For the three months ended June 30, 2014, international revenue was \$726,392, compared to \$797,584 for the three months ended June 30, 2013, a decrease of \$71,192 (9%); the decrease in total revenue was due to the completion of a contract with an international customer.

Product revenues increased \$8,898 (5%) from \$165,029 for the three months ended June 30, 2013, to \$173,927 for the three months ended June 30, 2014. The increase in product revenues was due mainly to revenues generated by a new subsidiary acquired during the three months ended June 30, 2014.

Cost of Revenues

During the three months ended June 30, 2014, cost of revenues totaled \$1,538,460 compared to cost of revenues during the three months ended June 30, 2013 of \$1,595,651, a decrease of \$57,191. The decrease in cost of revenues was largely the result of decreases in communication costs.

Depreciation for the three months ended June 30, 2014 and 2013 totaled \$191,823 and \$343,835, respectively. Depreciation costs are based on a three-year useful life for TrackerPALTM and ReliAlertTM® devices. Devices that are leased or retained by us for future deployment or sale are depreciated over three years. The Company believes this three-year life is appropriate due to rapid changes in electronic monitoring technology and the corresponding potential for obsolescence. Management periodically assesses the useful life of the devices for appropriateness.

The Company expects the cost of revenues as a percentage of revenues to decrease in the foreseeable future due to economies of scale realized through projected increases in revenues, further development of our proprietary software, enabling each operator to monitor more devices resulting in lower monitoring center costs, and the use of more efficient supply channels.

Gross Profit and Margin

During the three months ended June 30, 2014, gross profit totaled \$1,612,361, or 51% of net revenues compared to \$1,089,563, or 41% of net revenues during the three months ended June 30, 2013.

Research and Development Expenses

During the three months ended June 30, 2014, research and development expenses totaled \$460,729 compared to research and development expenses for the three months ended June 30, 2013 totaling \$269,072, an increase of \$191,657. These research and development costs were incurred to improve efficiency in the software, firmware and hardware of our products and services including the development of new electronic monitoring devices and other research and development costs incurred by a new subsidiary acquired during the three months ended June 30, 2014.

Selling, General and Administrative Expenses

During the three months ended June 30, 2014, selling, general and administrative expenses totaled \$3,611,797 compared to \$2,075,796 for the three months ended June 30, 2013. The increase of \$1,536,001 primarily resulted from increases in legal, consulting and other outside services expenses (\$341,907), in connection with preliminary work and preparation for a large international contract and for other expenses related to the acquisition of two new subsidiaries during the three months ended June 30, 2014. Additional increases in selling general and administrative costs resulted from increases in payroll and payroll related expenses (\$207,013), travel expenses (\$58,511), and operating expenses (\$989,053) of the Company's new Chilean, Israeli and U.S. subsidiaries which were not a part of the consolidated entity at June 30, 2013.

Other Income and Expense

For the three months ended June 30, 2014, interest expense was \$181,266 compared to \$2,737,220 for the three months ended June 30, 2013. This decrease in interest expense resulted primarily from a reduction in convertible debentures and the acceleration of certain debt conversion features into common stock. For the three months ended June 30, 2014, other expense was \$5,542, compared to \$80,298 for the three months ended June 30, 2013. This increase in other expense resulted primarily from a settlement agreement.

Net Loss

The Company had a net loss from continuing operations for the three months ended June 30, 2014 totaling \$2,802,427 compared to a net loss of \$4,132,763 for the three months ended June 30, 2013, a decrease of \$1,330,336. This decrease in the net loss is a result of a large decrease in interest expense offset by increases in operating and research and development expenses.

Continuing Operations - Nine months ended June 30, 2014, compared to nine months ended June 30, 2013

Revenues

For the nine months ended June 30, 2014, the Company had revenues from operations of \$8,265,904 compared to \$13,081,610 for the nine months ended June 30, 2013, a decrease of \$4,815,706 (37%). Of these revenues, \$7,880,441 and \$12,617,534 were from monitoring and other related services, a decrease of \$4,737,093 (38%); this decrease resulted primarily from the completion of a contract with an international customer. Product revenues decreased \$78,613 (17%) from \$464,076 for the nine months ended June 30, 2013 to \$385,463 for the nine months ended June 30, 2014.

Cost of Revenues

We expect the cost of revenues as a percentage of revenues to decrease in the foreseeable future due to economies of scale realized through projected increases in revenues, further development of our proprietary software, enabling each operator to monitor more devices resulting in lower monitoring center costs, and the use of more efficient supply channels.

Gross Profit and Margin

During the nine months ended June 30, 2014, gross profit totaled \$4,234,848, or 51% of net revenues, compared to \$6,464,371, or 49% of net revenues during the nine months ended June 30, 2013.

Research and Development Expenses

During the nine months ended June 30, 2014, research and development expenses totaled \$1,153,474 compared to research and development expenses for the nine months ended June 30, 2013 totaling \$668,269. These research and development costs were incurred to improve efficiency in the software, firmware and hardware of our products and services including the development of new electronic monitoring devices and other research and development costs incurred by a new subsidiary acquired during the nine months ended June 30, 2014

Selling, General and Administrative Expenses

During the nine months ended June 30, 2014, selling, general and administrative expenses totaled \$8,347,220 compared to \$6,238,783 for the nine months ended June 30, 2013. The increase of \$2,108,437 is primarily the result of increases in legal, consulting and other outside services expenses (\$630,057), in connection with preliminary work and preparation for a large international contract and for purchase expenses related to the acquisition of two new subsidiaries during the three months ended June 30, 2014. Additional increases in selling general and administrative costs resulted from increases in travel expenses (\$319,933), and operating expenses (\$1,592,223) of the Company's new Chilean, Israeli and U.S. subsidiaries which were not a part of the consolidated entity at June 30, 2013. These increases were offset by a decrease in payroll and payroll related expenses (\$338,455) during the nine months ended June 30, 2014.

For the nine months ended June 30, 2014, net interest expense was \$528,445 compared to \$5,939,171 for the nine months ended June 30, 2013. This decrease in interest expense resulted primarily from a reduction in convertible debentures and the acceleration of certain debt conversion features into common stock. For the nine months ended June 30, 2014, other income was \$619,238 compared to other expense of \$241,797 for the nine months ended June 30, 2013. This increase in other income resulted primarily from a settlement agreement

Net Loss

The Company had a net loss from continuing operations for the nine months ended June 30, 2014 totaling \$5,379,030 compared to a net loss of \$6,194,027 for the nine months ended June 30, 2013. This decrease in the net loss is a result of a large decrease in interest expense offset by increases in operating and research and development expenses.

Discontinued Operations - Nine months ended June 30, 2014, compared to Nine months ended June 30, 2013

Effective January 1, 2013, the Company also sold to the former principal of the wholly owned subsidiary, Court Programs, Inc., all of the issued and outstanding capital stock of Court Programs, Inc. and its affiliated entities to the former principal of Court Programs, Inc. Because these entities were a component of the consolidated entity, this sale requires discontinued operations reporting treatment of their operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The business extends to several countries outside the United States, and we intend to continue to expand our foreign operations. As a result, our revenues and results of operations are affected by fluctuations in currency exchange rates, interest rates, and other uncertainties inherent in doing business in more than one currency. In addition, our operations are exposed to risks that are associated with changes in social, political, and economic conditions in the foreign countries in which we operate, including changes in the laws and policies that govern foreign investment, as well as, to a lesser extent, changes in United States laws and regulations relating to foreign trade and investment.

Foreign Currency Risks. We had \$2,229,964 and \$7,653,637 in revenues from sources outside the United States for the nine months ended June 30, 2014 and 2013, respectively. Although we typically transact the sale of monitoring equipment and services in U.S. Dollars, we received some payments in an equivalent value of foreign currencies which resulted in a foreign exchange loss of \$4,232 and \$62,391 during the nine months ended June 30, 2014 and 2013, respectively. Changes in currency exchange rates affect the relative prices at which we sell our products and purchase goods and services. Given the uncertainty of exchange rate fluctuations, we cannot estimate the effect of these fluctuations on our future business, product pricing, results of operations, or financial condition.

We do not use foreign currency exchange contracts or derivative financial instruments for trading or speculative purposes. To the extent foreign sales become a more significant part of our business in the future, we may seek to implement strategies which make use of these or other instruments in order to minimize the effects of foreign currency exchange on our business.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), (i) is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission ("SEC") rules and forms and (ii) is accumulated and communicated to our management, including the members of our Executive Committee (our acting principal executive officers) and Chief Financial Officer (our principal financial and accounting officer), to allow timely decisions regarding required disclosure. Our management evaluated, with the participation of our Executive Committee and Chief Financial Officer, the effectiveness of our disclosure controls and procedures, as such term is defined under Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act. Based on this evaluation, our Executive Committee and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of June 30, 2014.

Changes in Internal Controls

We maintain a system of internal control over financial reporting that is designed to provide reasonable assurance that our books and records accurately reflect our transactions and that our established policies and procedures are followed. There was no change in our internal control over financial reporting during our quarter ended June 30, 2014 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
